Contributions to master, excluding merge commits

AK-Ultra #1
29 commits 1,802 ++ 1,198 --

VincentVRV #2
19 commits 540 ++ 129 --

TannerQuigley #3
17 commits 566 ++ 1,191 --

oscardel13 #4
16 commits 367 ++ 31 --

elin3952 #5
1 commit 19 ++ 19 --

To Run the app: In the terminal go to the location of all the files and use the code below.
$ export FLASK_APP=app.py flask run
And it will run app.py on a local server.
 * Running on http://127.0.0.1:5000/
To actually do this, you need Flask, a virtual environment (optional), and FLASKAPP.
